

Training information and rules during COVID-19

The BHV practical courses will continue, albeit in a modified form!

You have existing agreements with us about rates and the number of students. In the period that we have to take into account COVID-19, keeping 1.5 meters away is an important factor. This means that during a training at your location, a space must be made available that meets these requirements. Based on the safety and hygiene guidelines, we offer you the choice to train in the following group sizes: 12 / 8 / 6 people. The following rules apply to this:

- The space that is available determines the maximum number of students.
- A minimum of 7m² is required per student (and trainer). This is the minimum space a student needs to complete the assignments properly and responsibly.
- Preferably this should be a room with a separate entrance and exit.
- The room must be furnished according to the guidelines regarding distance. You will find an example of a proper setup.
- The room has been carefully cleaned prior to the training.
- There should be garbage bins per table in the room for, among other things, the waste of cleaning agents and used products
- training resources.
- There should be sufficient facilities for washing hands, such as sufficient hand soap and paper towels.
- You should clearly indicate which students will be attending. We can only grant access to students who are pre-registered.
- The instructor is leading in determining whether the space is sufficiently large and thus the requirements can be met.
- If it turns out on the training day that the space is not sufficient, the instructor determines together with the contact person in your organization which students cannot participate and therefore have to catch up with the training at another time.
- You must inform the students in advance about the conditions and house rules to participate.

If you cannot arrange a suitable space yourself, PROV Integrale Safety can rent a space at 'De Hofclub' in Woerden or Utrecht. For more information, visit www.hofclub.nl. Reduced rates apply: please contact us for a suitable proposal.

House rules on the training day

On the training day itself, the following house rules apply:

- Stay at home if you have one of the following complaints: nose cold, runny nose, sneezing, sore throat, mild cough, increase (from 38 C°).
- Stay at home if someone in your house has a fever (from 38 C°) and/or shortness of breath.
- Do not shake hands.
- Keep at least 1.5 meters away from each other.
- Make sure you are fit: take enough rest and ensure good nutrition and personal hygiene.
- When you cough or sneeze, do it on the inside of the elbow.
- Wash your hands well and regularly with soap and water, or use hand disinfection gel.
- Don't make coffee: use the facilities available in the room.
- One person can go to the toilet / toilet group at a time.
- Use the assigned personal protective equipment.
- The trainer ensures the presence of sufficient (nitrile) gloves, suitable training materials and cleaning agent for the materials to be used during the training
